

News

1. Chemico Philippines Inc. held a seminar for color cosmetics on November 21, 2018 at Chemico Philippines Application Center, the Philippines. The seminar focused on powder-based and emulsion-based makeup products as well as makeup trends 2018-2019. Clients made their own prototypes as follows: Illuminating Satin Eyeshadow, Oil Control Pressed Powder and Moisture Foundation with SPF 30. They were so thankful for joining the seminar because they learn a lot. Also, we helped them to improve and troubleshoot their existing formulations.

2. Aim to give big thanks to all dear customers who always support for a successful year, DSM in collaboration with Chemico Vietnam Co., Ltd. held a joyful Outing Activity Day at Binh Quoi 2 Resort on November 22, 2018, Vietnam. Inspired by the innovative topic "House of Nature besides Cloud Block", most of the games were played outdoor to introduce the powerful of new sun care formulas and UV Camera. Especially, all games were customized to blend with the ingredient's function as well as new formulas to help customers review the specific ingredients' knowledge in a very exciting atmosphere.

3. AGC Si-Tech Co., Ltd. in collaboration with Chemico Inter Corporation Co., Ltd. held a seminar entitled "Powder for manipulating light and its application to cosmetics: UV protection / Create beautiful skin" on November 28, 2018 at Chemico Asia Health and Beauty (CAHB) II Center, Thailand. We provided knowledge on science of light, UV protection, creating beautiful skin and environmental problems in cosmetics. The seminar also introduced benefits of Sunsphere series and how to use them in all applications.

Introduction to Flavours/Flavouring Substances

What are Flavours/Flavouring substances? Flavours/Flavouring substances are used to improve or modify the odour and/or taste of food for customer benefits. The usage of unique flavour is to create a unique product. Understanding the label classification can help to choose the flavour that is suitable for health concerning people and the requirement in each religion.

Flavouring substances and their preparations should be labelled in compliance with the EC Regulation No. 1334/2008 only.

- Labelling as "natural X¹ flavouring" with reference to the name of the source may only be used if the flavouring component has been obtained exclusively or by at least 95% (w/w) from the cited source, the other maximum 5% (w/w) must also be natural.
- Labelling as "natural X¹ flavouring with other natural flavourings" may only be used when the flavouring component has been partially derived from the cited source and the flavour of the source is easily recognizable.
- Labelling as "natural flavouring" without reference to the name of the source may only be used when a flavour is derived from different source materials and a reference to the source materials would not reflect their flavour or taste.
- Labelling as "natural flavouring substance(s)" may only be used for flavourings where the flavouring part contains exclusively natural flavouring substances.
- Smoke flavourings added to impart smoky flavour to the food must appear in the list of ingredients, either as "smoke flavouring(s)" or with a reference to the source (wood) used for its production.

¹ X stands for food(s) or food category or source(s).
