### Clean and Clear Label Trends in Food 2019

Clean and Clear Label is one of health awareness trends that most consumers prefer to see more transparency on labels. Consumers want to know more information about ingredients such as chemical/natural source, how and where products are made.

There are attributes to classify clean and clear labels. Clean labels are products with ingredients that are free from artificial ingredients, fresh, short and easy-to-understand list and non-GMO. Clear labels are products that consumers desire to know about manufacturing such as origin of ingredients, minimally processed, low environmental impact and ethical treatment of people and animals. All of these attributes can be seen on label resulting trust in the products.

Nowadays, consumers have increasing demand for clean label products as they concern about long-term effects of synthetic colors on health leading to the preference in natural colorants. Some studies show that around 88 % of consumers are willing to pay a higher price for products containing naturally-sourced ingredients. And, around 80 % of consumers give strong attention to reading ingredient lists on product before purchasing.

## Regulation

### Thai FDA List of Statement of Nutrient Function Claim (part 1)

Statement of nutrient function claim shall be approved by the Food and Drug Administration. The announcements were issued as follows. 1) Statement of claim shall be compiled as described in the list by declaration of name of claimed nutrients. If there are many statements of nutrient claim, either a statement or any statements may be declared, but declaration of such statements shall be consecutive. 2) Statement of "should eat a variety of 5 food groups in an appropriate proportion on a regular basis" shall be added with the nutrient function claim by clearly visible letters. This announcement came into force on August 12, 2008.

No.	Nutrient	Function Claim
1	Protein	1.1 Protein contributes to a growth and help repair body tissue. 1.2 Protein contributes to a source of indispensable amino acids for body protein synthesis.
2	Dietary fiber	2.1 Dietary fiber contributes to an increase in fecal mass and stimulate the bowel movement.
3	Vitamin A	3.1 Vitamin A has a role in body growth. 3.2 Vitamin A contributes to the maintenance of normal vision. 3.3 Vitamin A contributes to the maintenance of normal mucous membrane. Remark: Beta-carotene can only specify as "Beta-carotene is precursor of Vitamin A"

To be continued next month.
