

DID YOU KNOW

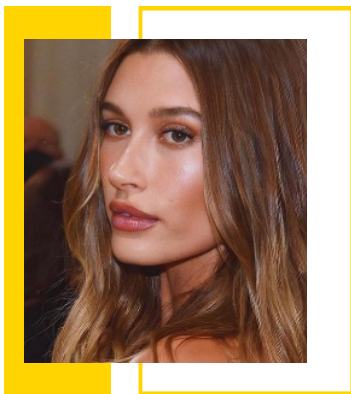

KNOW

7 Gorgeous Makeup Trends to Try in 2022

1. Bright blush

Blush is back. Statement blush and even over-blushing are one of the newest makeup Trends. Color of choices are, for example, bold peach and punchy pink. To create this style, the blush is applied on the apple of the cheek and pulled into the temple and into the crease of the eye.

2. No-makeup makeup

To create this look, it is recommended to mix a face moisturizer with foundation then even out your complexion to achieve minimal coverage with a glowing finish. Or, you can use a luminous, dewy foundation or a barely-there skin tint. On blemishes, medium- to full-coverage foundation can be used.

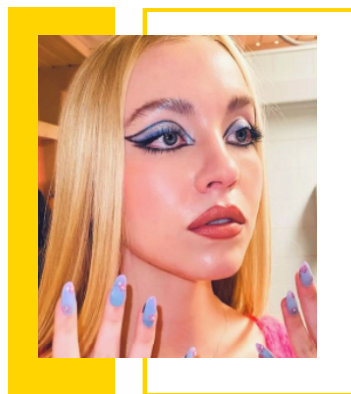

3. Tantouring

Tantouring is contouring technique using a self-tanner to create a more natural, effortless style that stays all day long. Mix a few drops of tanning serum with your moisturizer and apply on the areas that you want to contour (i.e., nose, cheek line, jaw, etc.).

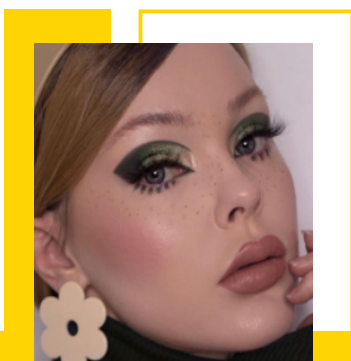

4. Glossy lips

Texture is a major trend this year! Either nude or a bit more color, the juicy, hydrated glass-looking lip is very popular these days. Using a high-shine gloss and putting the glossy lip along with a matte complexion or matte eyeshadow look are possible to play.

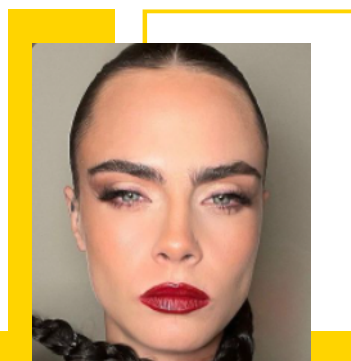

5. Statement eyes

Eyes are still on the focus. Bright eyeshadow, graphic lines and glitter can be seen everywhere right now.

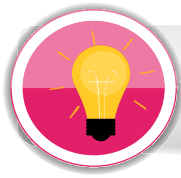

6. Faux freckles

Faux freckles are one of summer's biggest beauty trends. They are something that many people are born with and try to hide. But, right now, freckles are being embraced and celebrated for their beauty. "Freckles are a trend now!!"

7. Bold brows

Makeup is all about showing off your personality **this year, after all.** Full and fluffy brows are just one of many bold features that we will see a lot. Brow lamination also remains popular this year.

Regulation

Principle and Requirement about Notification of Body Cleansing Sheet Products (Wet Wipe) (part 1)

- Wet wipe is a cloth or paper sheet immersed in solution containing cosmetic ingredients. The purpose of use is for cleansing only such as cleansing body, arms and legs, hands or buttock of children, etc. In case of containing alcohol, it shall not exceed 69.4 % w/w.
- The supporting documents for notification must include photo of real products and labels posted on every side of products for consideration.

Remark: If the document attached is not in English, a Thai translation must be included (translated by a government authority) such as a language institute of university, etc.
