

Fall / Winter 2022-2023

Makeup Trends

1. Ornamental

It is time to accessorize the face with a bit of extra jewelry like crystals, barrettes and faux piercing.

2. Straight Lines

Black or neon graphic lines drawn over eyes were spotted at many stages.

3. Smoke Show

Sultry and smoky look using black or earthy monochrome can be added to any outfits.

4. Get Cheeky with It

Heavy pigmented blusher and/or bronzer are used to brush and contour the face.

5. Red Hot

The classic red shades are elegant, versatile and never go out of style. There are many shades and finishes from matte, satin to gloss.

6. Klein Blue

This ultra-saturated blue shade was created and patented by Yves Klein in 1960. It makes an appearance on eyelids, lips and hair now.

7. Heavy Metal

The striking and metallic sparkling eyeshadow is about to be seen everywhere.

8. Bleached Brows

Bleached eyebrows were introduced by Pat McGrath around ten years ago, and they have made their way onto the runways this season. Although it was not so sure for real life.

9. Night Owl

This look is inspired by Berlin's nightlife. A dark kohl is applied on the eye areas. The smoother and more smudged the better.

OUR News : Sep 2022

DCAC Webinar, Indonesia (Jakarta)

Webinar presented by Daito Chemico Asia Color Cosmetics (DCAC) Center is always interesting for Kemiko Indonesia's customers. On August 25, 2022, PT. Kemiko Indonesia, Jakarta Indonesia in Collaboration with Daito Chemico Asia Color Cosmetics (DCAC) Center held a webinar entitled "All about Pressed Powder". This webinar talked about basic knowledge and formulation tips for pressed power products such as two-way cake, blush on, etc. During the webinar, many customers gave nice responses by questioning, and hopefully this would be a good start for them. In the past two years, many customers stop developing new decorative products due to the pandemic. But, right now, the situation is better, and this webinar could be a stepping stone for Indonesia's customers to start developing makeup products again.

Abyss Webinar, Myanmar

Abyss Ingredients, France together with Chemico Myanmar Co., Ltd. held a webinar entitled "Cartidyss: French Marine Collagen for Ingestible Beauty (Session I)" on September 20, 2022. This webinar focused on technical research and new trends in Beverage, Supplement and Pharmaceutical fields. Raw material information and their applications in Beverage, Supplement and Pharmaceutical products were also shared. Documents and prototypes will be sent to customers after webinar.

LABIO Seminar, Vietnam

As a specialist in BIO-technology, LABIO focuses on researching the world of Extremophile and developing dermatological benefits from Fermentation technology. Therefore, Chemico Vietnam Co., Ltd. handed up with LABIO for a very joyful talk show on September 21, 2022 under the topic "LABIO'S Fermentology - Discover a New Level of Skin Well-Being". All latest trends and innovative yet eco-friendly ingredients as well as formulations were shared to all attendees throughout the day.

CAHB Webinar, Myanmar

Chemico Myanmar Co., Ltd. organized an interesting webinar on September 22, 2022 under the topic "What's New in Home Care Trend." The webinar presented home care trend, updated the overview of home care in Myanmar and talked about information of home care raw materials. Attendees were interested and participated in Q&A and sample request section as well. All requested samples and documents will be distributed to the customers after the webinar.

Abyss Webinar, Myanmar

Abyss Ingredients, France together with Chemico Myanmar Co., Ltd. held a webinar entitled "Enhance People Well-Being and Healthy Aging with Innovative Ingredients (Session II)" on September 28, 2022. This webinar talked about new trends in supplement and pharmaceutical and the ingredients for Stress Management - Peptidyss and Mmemosyss. Most of participants were from Pharmaceutical sector, and they are very interested in our webinar.
